As at 31 March 2024, the capital expenditure contracted but not provided for in the consolidated financial statements in respect of property, plant and equipment was HK\$422,558,000 (2023: HK\$967,636,000), of which HK\$155,986,000 (2023: HK\$263,839,000) was related to a building located in Qianhai in Shenzhen.

This financial year marked the adjustment year before the global economy settling into a new stable pattern after the volatile performance during the COVID-19 pandemic (the “Pandemic”). The PRC market experienced overall growth slowdown with notable consumption downgrade, and orders from overseas markets showed a trend of decrease before increase. During the Review Period, we proactively explored the overseas markets, adjusted our domestic marketing strategy in the new era, and effectively strengthened internal management to achieve better control over costs and expenses. We recorded a revenue of HK\$18,411,197,000 for the Reporting Period, representing an increase of 6.1% year-on-year. The profit attributable to owners of the Company was HK\$2,302,366,000, representing an increase of 20.2% year-on-year. The branded sales business in the PRC accounted for over 65% of the Group’s revenue during the Review Period, and the profit attributable to owners of the Company increased by approximately 25.5% in RMB terms.

1

In the first year following the end of the Pandemic, although the PRC economy experienced growth slowdown and notable consumption downgrade, smart home products have become increasingly popular among the broad consumers. The penetration rate of recliner in the PRC market increased rapidly from 7.2% in the calendar year 2022 to 9.7% in the calendar year 2023, and was forecasted to exceed 13% within five calendar years according to Euromonitor International. With the main revenue stream of the soft furniture industry gradually shifting from real estate sector to a new pattern with the existing market as core growth driver and the core competitive strength gradually shifting from focus on marketing channels to competition of products and brands, the Group has been focusing on product research and development, with the strategy of synchronic emphasis on brand building and channel expansion starting to show positive advantages. In a market environment with sluggish sales and relatively weak demand following the implementation of real estate regulation policies, the Company recorded revenue from principal operations (excluding revenue of other business) of HK\$11,986,885,000 in the PRC market, representing an increase of 8.1% from HK\$11,092,715,000 for last year, and an increase of 12.8% in RMB terms.

The Group enjoys a strong first-mover advantage in both traditional e-commerce platforms such as Tmall and JD and livestreaming e-commerce. Leveraging on the user base of a million fans and brand recognition that we built up over the past ten years, we translated such strength into customer traffic to our offline stores. On the online sales front, we continued to enhance brand influence and sales growth through short video promotions, self-owned store livestreaming, and in-depth cooperation with top streamers. In the offline sales channels of the China market, we focused on scientific management of same-store growth in stores this year, making store management more refined and healthy. Based on our nationwide city store layout and the current economic and consumer market situation in FY2024, we focused on expanding stores in lower-tier markets and adding value-for-money series in first and second-tier cities. As at 31 March 2024, the Group had a total of 7,236 brand specialty stores in China (excluding Style (格調) and Suning stores). During the Review Period, the Group achieved a net increase of 765 specialty store outlets.

2

During the Review Period, we witnessed relatively notable recovery in demand and orders from overseas markets. We proactively took part in exhibitions and trade fairs to explore new channels and new customers, reshaped talent cultivation mode for our sales team, and stepped up efforts in research, development and upgrading of new products for exports. The Group recorded rapid double-digit growth in overseas revenue since the second half of FY2024, compensating for the decrease in orders in the first half of FY2024.

During the Review Period, the Group's revenue from the North America market amounted to HK\$4,284,307,000, representing a year-on-year increase of 2.3% from HK\$4,188,848,000 for the Last Corresponding Period.

During the Review Period, the Group's revenue from the Europe and other overseas markets (excluding Home Group) amounted to HK\$1,195,089,000, representing a year-on-year increase of 2.9% from HK\$1,161,066,000 for the Last Corresponding Period.

During the Review Period, the revenue of Home Group increased by approximately 10.0% year-on-year to HK\$674,136,000. The Group's production facilities in Ukraine have not been materially disrupted during the Review Period, but the management continues to monitor the situation in Ukraine following the outbreak of the war between Russia and Ukraine.

As the globally largest smart furniture enterprise, the Group has become the first company in the world to create recliner sofa products featured with "close alignment with the wall and zero gravity feeling". We continue to create comfortable and trendy smart furniture products by carrying out second technical iteration in terms of "close alignment with the wall" in 2024. At the same time, we continue to step up efforts in research and development of new products and technical innovation of core components, and the Company owns 1,433 core patents, of which 406 patents are newly registered in FY2024. As the old saying goes "it takes ten years to grow trees, but a hundred to cultivate people", it takes us thirty years to build up a well-known national brand. We will continue to strengthen the influence and reputation of CHEERS, First Class CHEERS and other brands among consumers in China, so as to gain greater brand recognition for their function, quality and price, making CHEERS and First Class CHEERS the first choice for consumers when replacing furniture. According to survey result by Euromonitor International, the Group ranked first globally in terms of recline sofa sales volume for six consecutive years.

With the PRC economy shifting from large-scale development to high-quality development, the consumption of the furniture industry gradually transits from growth driven by expansion of the real estate market in the past to focus on replacement of existing products. Due to our persistent pursuit for quality lifestyle, the percentage of large-sum expenditures on purchasing properties decreases while spending power of the consumers on home products to create greater sense of happiness is enhanced. When replacing furniture, the consumers will place greater emphasis on the combination of brand, quality and price, thus functional furniture becomes increasingly favoured by consumers due to the intelligent and convenient user experience. Currently, China's recliner sofa and smart furniture industry is still in the development stage of low penetration rate and high growth potential. As the globally largest smart furniture enterprise in terms of business scale, the Group will leverage on its advantages in product quality, brand recognition and marketing channels that it gained over the past years to achieve continuous market share growth in the future in terms of the large-scale inventory market in China.

As disclosed above, neither the Company nor any of its subsidiaries has purchased, sold or redeemed any of the Company's shares during the Review Period.
